

COIL COMPATIBILITY LIST

This chart lists the compatibility of various coils with MSD Ignition Controls. It is impossible to list every coil combination and it is recommended to check with the coil manufacturer before installation.

★ - Indicates preferred coils for model indicated. YES - Coil is compatible with the model indicated. NO - Coil is NOT compatible. Do not use.	MSD 5/ BLASTER	MSD 6- SERIES	7AL-2, 7AL-3 SERIES	DIGITAL-7 SERIES

* The factory coil from any vehicle that has a 12 volt negative ground electrical system and has a ballast resistor or resistance wiring in the original ignition key wire will work with the MSD.

NOTE: For MSD 8-Series Ignitions use Pro Power Coil, PN 8201, Pro Power HVC, 8251, or Pro Power HVC II, PN 8261.

HELPFUL COIL INFORMATION

- A ballast resistor is not necessary with any MSD Series Ignition but can be left in-line if originally equipped.
- The MSD Blaster Coils and any other oil-filled, canister style coils should be mounted so that the high voltage coil tower is pointed upward. Also, mount the coil so the coil wire is as short as possible to keep resistance low.
- Use of any coil that is not compatible may damage the MSD and void the warranty.

Caution: Coils that have an internal power transistor are **NOT** compatible with MSD Ignition Controls. These are generally found on late model DIS or coil-per-cylinder ignitions. Check with MSD if you have any questions before installing an MSD Ignition Control.
