TRANSMISSION CONTROL MODULE

The all-new MSD Transmission Controller was developed completely in-house – evolving from the engineering expertise and proven performance of our Atomic EFI technology.

- Adjust the operating parameters of later model electronically controlled 4-speed transmissions
- Simple to configure with the supplied Handheld Monitor – no PC required*
- Direct plug-in harness with OEM style connectors
- Adjust shift points, shift firmness, torque converter clutch behavior, and more
- Monitor the operation of your transmission in real-time

* Handheld not supplied with Brainwave ready TCM.

TRANSMISSION CONTROLLER HARNESES

A harness must be purchased separately.

MSD offers the following harnesses to connect the Atomic TCM to your transmission.

Ford

- PN 2772 - AODE/4R70W, 1998-up
- PN 2773 - AODE/4R70W, 1992-1997
- PN 2774 - 4R100, 1998-up
- PN 2775 - E40D, 1995-1997
- PN 2776 - E40D, 1989-1994

GM

- PN 2770 - 4L60-85E, 1993-up or 4L70, 2006-2008
- PN 2771 - 4L70, 2009-up

TCM

TRANSMISSION CONTROL MODULE

PN 2760

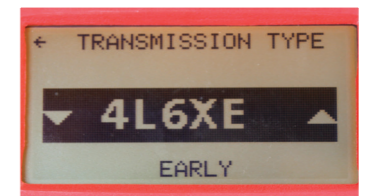

AVAILABLE AS A STAND ALONE OR BRAINWAVE COMPATIBLE CONTROLLER.

Stand Alone TCM - PN 2760

- Works on any application with a compatible transmission
- Make changes and view live data on the supplied handheld controller.

Brainwave Compatible TCM - PN 2761

- The Brainwave ready TCM allows for seamless integration with the Atomic EFI to reduce wiring and simplify setup.
- Uses the Brainwave mobile app to make changes and view live data on your tablet or smart phone.

EASILY MODIFY THE OPERATING PARAMETERS OF LATE MODEL 4-SPEED AUTOMATIC TRANSMISSIONS

- Adjust Shift Points
- Torque converter operation
- Shift firmness
- Auto and manual shift modes
- Dyno mode

The Atomic Transmission Controller is easy to connect with OEM style connectors.

*Not legal for use or sale on pollution controlled vehicles.
