PARTS LIST

Qty	Part #	Description
1	D982-0002	Carbon Mirror Cover; Right
1	D982-0003	Carbon Mirror Cover; Left

Congratulations for being selective enough to use a DINAN Carbon Mirror Cover Set. We have spent many hours developing this kit to assure that you will receive maximum performance and durability with minimum difficulty in installation. Please take the time to read these instructions and call us if you have any difficulties during the installation.

NOTE: This kit does not fit all combinations of vehicles & engines. Please pay careful attention to the vehicles listed above. Do not install this kit if your specific vehicle configuration is not shown. Please contact your Dinan representative if you have any questions.

INSTALLATION:

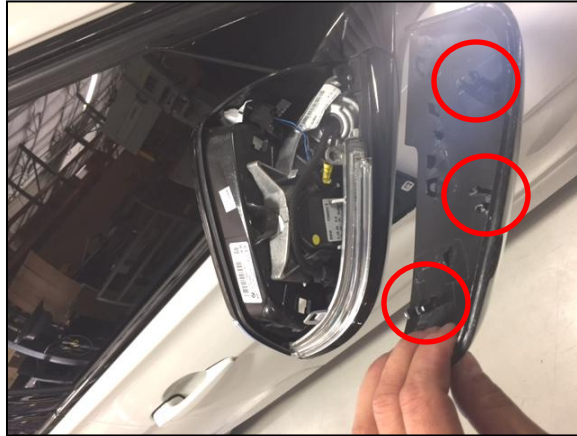

1. To minimize risk of damage, let the mirror assemblies cool/warm to room temperature.
2. Press mirror glass by hand to slowly tilt it up to the top most position.
3. Using an appropriate tool (wrapped if necessary, prevent damage to the glass), unclip the mirror glass starting at the bottom, and working your way around.

4. Release any plug connections and set mirror glass aside.

5. The mirror cover is secured with several latches. Starting at the outside latch mechanism and working your way inward, compress the locking tangs while pulling the mirror cover outwards. Once released, set mirror cover aside.

6. Install Dinan carbon mirror cover, making sure that all latches are secure.
7. Reinstall mirror glass, making sure it is secured into place.
8. Verify that the mirror adjustment functions correctly.
9. Repeat procedure for other mirror cover.
10. Enjoy!

NOTE: Proper care will enhance the appearance of your Dinan carbon mirror covers. Please keep these parts clean and waxed at all times. Like any surface, poor maintenance will allow deterioration to take hold.
