

THROTTLE BODY CLEAN

Throttle body system cleaner

Aerosol

TYPE OF USE

MOTUL THROTTLE BODY CLEAN is a high performance cleaner especially developed for cleaning of throttle body and idling control valves. Eliminates deposits and varnish on butterfly and throttle valves, throttle-chambers and idling control valves.

Cleaning agent for repair, assembly and regular maintenance work.

Also suitable for external and internal cleaning of carburetors. Cleans nozzles, bushels, jets, tanks, floats and venturi tubes.

PERFORMANCE

MOTUL THROTTLE BODY CLEAN stabilizes the idle and improves engine acceleration.

Quickly and effectively removes deposits as oil, grease, rubber and resin accumulated over time in the intake, at the throttle body and idling control valves without dismantling.

Provides lubrication of the cleaned parts due to the contained lubricants.

Regular cleaning improves the engine starting properties and reduces the fuel consumption.

RECOMMENDATIONS

Shake can before use.

Spray the product onto the contaminated parts from a distance of approx. 20 cm and let it run off.

Let the parts dry properly.

Let stand and re-spray on very dirty areas if necessary.

Wipe with a dry piece of fabric.

SECURITY

Refer to the MSDS sheet and the information mentioned on the aerosol.
